

**SNOW REMOVAL:** We can't stop the snow but we do have to remove it! Removal of snow, ice and accumulations from sidewalks will now have to be done within **24 hours** after the accumulation. If the property owner does not do so the City may do so at the owner's expense. When the City declares a Snow Emergency there is **NO PARKING ON ANY STREETS**. Thanks for your cooperation.

**BUILDING PERMITS:** With the adoption of the International Building Code 2006 Edition the only 2 items **exempt** are fences less than 3' high and one-story detached structures with floor area not to exceed 120 square feet. Please remember to get your permit before construction begins.

**WATER PROJECT UPDATE:** This last summer we drilled a new well and built a new well House and installed a chlorination system to meet DNR standards. We also extended water And sewer out to the new fire station site and a new fire hydrant for the school. Old 4" lines Were replaced with 6" and 8" lines and looping was done from North Street to Strong Drive. The Houses on 3<sup>rd</sup> Ave. were connected to the 8" line. All of this should result in better circulation and better pressure for everyone. There is a scheduled rate increase on January 1<sup>st</sup> 2011. If you have area of grading or seeding from this summers construction that is no complete please call City Hall 842-2692 or drop a note in the utility payment box. In the spring we will complete the project.
